

The following was sent to the Strong Foundations committees on May 15, 2008.

Dear Members of the Core Competencies and Design Committees:

As you see from your email (a copy of the letter is attached, in case you haven't received a it yet through your campus email), we are going to take some time for reflection on the core curriculum planning. Dorothy and I would still like to meet with you later this summer; more on that soon.

I am grateful for your extraordinary work and dedication to date. For those of you receiving stipends, your checks are being processed, as planned. Please find Mendi Spencer with any questions related to this.

Please call me if you have any questions that I can answer, but the letter sent to all faculty summarizes my thoughts for now.

All the best for a restful summer, and look forward to seeing you.
Thanks again,

Susan Herbst
